In the Claims:

Although no amendments have been made to the claims, for convenience the pending

claims are listed to follows:

1-13. (Cancelled)

14. (Previously Presented) A progressive gaming system comprising:

a first gaming device having an input device, a display and a controller, wherein the first

gaming device is configured to receive a wager from a first player to play a progressive type

game; and

a second gaming device having an input device, a display and a controller the second

gaming device being communicably coupled to the first gaming device, wherein the second

gaming device is configured to receive a wager from a second player to play the progressive type

game,

wherein the first and second gaming devices exchange, with each other, information

associated with the amount of wagers placed by the first and second player on each respective

gaming device by exchanging an electronic data packet of a predetermined format, in order to

determine the total jackpot amount to be won,

wherein determination of whether the first player has won, and the total jackpot amount

to be paid to the first player is performed by the controller of the first gaming device, and

wherein determination of whether the second player has won and the total jackpot

amount to be paid to the second player, is performed independently of the first gaming device, by

2

the controller of the second gaming device.

Atty. Docket No.: 4ACE-01000US0 taw/4ace/1000us0/1000us0.102

taw/4ace/1000us0/1000us0.102

15. (Previously Presented) The system of claim 14 further comprising a first and a second

precise time base, each configured to measure time of occurrence of events on the first and

second gaming devices, respectively, with a resolution of picoseconds.

16. (Previously Presented) The system of claim 14 wherein the first gaming device is

capable of initiating a secondary bonus game independent of the second gaming device and the

second gaming device is capable of initiating a second bonus game independent of the first

gaming device.

17. (Previously Presented) The system of claim 14 wherein the first gaming device and the

second gaming device communicate on a peer-to-peer basis.

18. (Previously Presented) A progressive gaming method comprising:

providing a first gaming device having an input device, a display and a controller,

wherein the first gaming device is configured to receive a wager from a first player to play a

progressive type game;

providing a second gaming device having an input device, a display and a controller, the

second gaming device being communicably coupled to the first gaming device, wherein the

second gaming device is configured to receive a wager from a second player to play the

3

progressive type game;

transmitting information about the wager placed by the first player from the first gaming

device to the second gaming device to the second gaming device;

Atty. Docket No.: 4ACE-01000US0 taw/4ace/1000us0/1000us0.102

taw/4ace/1000us0/1000us0.102

transmitting information about the wager placed by the second player from the second

gaming device to the first gaming device, wherein said wager information is transmitted by using

an electronic data packet of a predetermined format, in order to determine the total jackpot

amount to be won based on the wagers;

determining, by using the controller of the first gaming device, whether the first player

has won and the total jackpot amount to be awarded to the first player; and

determining, by using the controller of the second gaming device independently of the

first gaming device, whether the second player has won and the total jackpot amount to be

awarded to the second player.

19. (Previously Presented) The method of claim 18 further comprising:

broadcasting a parameter block of the predetermined format to all gaming devices;

when conditions change at any gaming device, updating said parameter block according

to the change in condition at said gaming device; and

broadcasting an updated parameter block from the gaming device to other gaming

devices communicably coupled thereto to update operational parameters at each gaming device

based upon the updated parameter block received.

(Previously Presented) The method of claim 18 further comprising:

upon determining that the first player has won, awarding a portion of the jackpot indicia

to the first player;

resetting all of the gaming devices; and

awarding a remainder of the jackpot indicia to the first player when all gaming devices

taw/4ace/1000us0/1000us0.102

4

are confirmed to be reset.

21. (Previously Presented) The method of claim 20 further comprising awarding a portion of

the remainder of the jackpot indicia as the gaming devices are being reset but not yet confirmed

as reset.

22. (Previously Presented) The system of claim 16, wherein the secondary game initiated by

the first gaming device has no dependency upon an outcome of the progressive type game.

23. (Previously Presented) The system of claim 16 further comprising a first secondary game

device communicably coupled to the first gaming device for initiating the secondary bonus

game,

wherein the first secondary game device further comprises

a display device,

a random number generator, and

a unit for calculating a value to determine a game outcome based upon use of generated

values of said random number generator in a predetermined formula.

24. (Previously Presented) The system of claim 16 further comprising:

a unit for choosing a random number in accordance with a predetermined selection

process and mapping said random number to a symbol in accordance with a predetermined

mapping process if the number of game plays of maximum bet in a play sequence is less than a

predetermined maximum; and

taw/4ace/1000us0/1000us0.102

5

a display device for displaying a generic icon as a placeholder to allow progress of the

secondary bonus game to be ascertained.

25. (Previously Presented) The system of claim 14 further comprising a first and a second

precise time base, each configured to measure time of occurrence of events on the first and the

second gaming devices, respectively, with a resolution of 10-15.

26. (Previously Presented) The system of claim 18 further comprising exchanging, between

the first and second gaming devices, a total amount available for play to the first and the second

player, prior to determining the total jackpot amount to be paid according to predetermined

parameters.
